Demand and Capacity Trainer Programme Participation Agreement

1. Overview

- 1.1 The national Demand and Capacity Programme has been set up to embed demand and capacity planning in local health economies and to make sure its principles, methodological approaches and datasets are understood and recognised by both commissioner and provider organisations.
- 1.2 Currently, the national team provides training for colleagues working in the NHS on demand and capacity planning. This training also provides an opportunity for providers and commissioners to get together and share their understanding of local plans. We, the national Demand and Capacity Programme Team, believe that moving forward, these training sessions and opportunities to work together should be delivered locally, owned locally.
- 1.3 For this reason, we have developed the Demand and Capacity Trainer Programme, which aims to train 300-400 NHS colleagues over three years in teaching and supporting demand and capacity planning locally.
- 1.4 To ensure training remains accessible locally, participating organisations have to agree to release their staff who participate in this programme, to deliver training locally post-graduation.
- 1.5 Therefore, participants in the Demand and Capacity Trainer Programme require the support of both their line manager and their executive level sponsor.
- 1.6 By signing this form the applicant, the applicant's line manager and the executive sponsor confirm that they have read and are agreeing to the terms and conditions of this document.

2. Study requirements:

As a rough guide, we estimate the time commitments for the training as follows:
